Career Objective

Passionate MERN developer with 2 years of experience in developing innovative web applications that solve real-world problems. I aim to continually expand my knowledge and skillset, staying updated with the latest technologies and best practices. Through collaborative teamwork and a commitment to excellence, I aspire to contribute to the success of dynamic projects, deliver exceptional user experiences, and advance my career as a MERN full stack developer.

Work Experience

Capgemini   Sept 2021 - Present

Client Portal- Senior Software Engineer
Domain - Financial Services
- Created a comprehensive financial dashboard that allowed clients to manage their finances effectively.
- Successfully integrated various widgets, including charts, cards, tables, dropdowns, and text boxes, to provide clients with a wide range of financial data representation and input options.
- Utilized High-charts to render interactive charts that provided clients with a visual overview of their financial data.
- Integrated React table components to display tabular financial data, incorporating features such as filtering options, virtualization, and pagination for enhanced data management.

CDAC - Software Engineer
Domain - Financial Services
- Played a key role in the development of a corporate credit card application website for American Express, offering a seamless and user-friendly platform for users to apply for corporate credit cards.
- Implemented various features and improvements to enhance the overall user experience, making the application process more intuitive and efficient.
- Optimized the application workflow to reduce friction, resulting in a more efficient and user-friendly process for applicants.

Proof Of Concept

Portfolio Website | HTML, CSS, JavaScript, React, Redux   GitHub
- Build and deploy a modern portfolio website with designs and ability to send email, download resume and redirect to social media sites.
- React best practices such as folder and file structure, hooks, routing and many more.
- Display about, experience and contact sections.
- Responsive and works on devices with different resolutions.

Food Order APP | HTML, CSS, JavaScript, React   GitHub
- Modern Food order app using React and Redux with functionality to add and delete food items to and from the cart.
- Implements state management of the entire application using React hooks.
- Implements Food items and items added to cart with http request with simple database.
- Currently working on building about, contact, login and register page functionality.

Social Media App | React, JavaScript, Node.js, Express.js, mongoDB   GitHub
- A complete Social Media web application with user friendly UI, adding posts and friends functionality, likes and commenting feature to the posts, Authentication and many more.
- The UI part is connected to the backend with express.js framework.
- It uses mongoDB database to store the entire data of users from the application.
- Authentication is added to get a proper login and logout feature to the users.

Skills

- React
- JavaScript
- HTML5 & CSS3
- Redux
- Node.js
- Express.js
- MongoDB

Certifications

React - The Complete Guide 2023 (incl. React Router & Redux)

The Complete JavaScript Course 2023: From Zero to Expert!
